LANGUAGES

Spanish — Native
English — B1 Technical

EDUCATION

Systems Engineering
Univ. Santiago de Cali
2020 – Present (10th sem.)

TECH SKILLS

AI / LLM

- FastAPI
- LangGraph
- Prompting
- LangChain
- Langfuse
- LangSmith

Backend

- NestJS
- Python
- Django
- Laravel
- .NET

Frontend

- Next.js
- React
- Angular
- TypeScript

Data / Infra

- PostgreSQL
- Redash
- Linux
- SQL Server
- Docker
- AWS

CERTIFICATIONS

- AWS Cloud Practitioner
- Cisco: Cybersecurity Essentials
- Cisco: Network Addressing
- Ciberseguridad (MinTIC)
- SENA Java Avanzado

COMMUNITY

- IEEE CS USC — President
- Ethereum Cali — Core Member
- Co-founder · moni.com.co

PROFILE

Software Engineer focused on AI-driven systems with a background in full-stack development, web platforms, and cloud architecture. My career has progressed from Frontend (React/Next.js) and Backend (NestJS, FastAPI), through Full Stack delivery, to AI Engineering: designing intelligent pipelines and agentic systems using LangGraph, FastAPI, and observability tooling (Langfuse, LangSmith). I enjoy turning ideas into real prototypes and bridging engineering, product, and business teams to deliver impactful solutions.

EXPERIENCE

Rappi

AI Software Engineer | Sep 2025 – Jun 2026

- Build AI-driven product features at scale within Rappi's platform.
- Design agentic workflows with LangGraph + FastAPI; define MCP/tool schemas discoverable by LLM systems.
- Implement observability pipelines (Langfuse, LangSmith) for tracing and continuous improvement.
- Drive context-injection and data pipeline strategies (PostgreSQL, Redash) to ground agents in business knowledge.
- Contribute to AI architecture decisions and support team-wide AI-first adoption.

Stack: FastAPI · LangGraph · Prompting · Langfuse · LangSmith · PostgreSQL · Redash · Linux

Corporacion Talentum

Full Stack Developer & Tech Lead | Oct 2024 – Jul 2025

- Led full stack development of digital platforms; coordinated teams, clients, and DevOps.
- Participated in technical decision-making and PoC validation for AI-enhanced proposals.

Stack: Next.js · NestJS · PostgreSQL

AsymmetricFrequency

Blockchain Engineer / Business Dev Officer | Jun 2024 – Sep 2025

- Designed blockchain solutions ensuring traceability, security, and process optimization.
- Led technical teams and managed full project lifecycle.

Stack: Ethereum · Solidity · Web3

CAF – Development Bank of Latin America

Power Platform Developer | May 2024 – Oct 2024

- Automated cybersecurity and functional-role management processes across the bank.
- Built reusable dashboards and BPM-aligned workflows with Power Platform and PowerApps.

Stack: C# · Power Platform · PowerApps

Universidad Santiago de Cali

Full Stack Developer | Apr 2024 – Jul 2024

- Developed SIPAC modules for DGI, OTRI, and Editorial Seal; led stakeholder requirement sessions.

Stack: Laravel · SQL Server

SENA

Digital Transformation Contractor | Feb 2023 – Dec 2023

- Implemented digital tools for administrative management; automated document workflows.

Stack: Python · Microsoft 365

Dutec

Backend Developer | May 2022 – Oct 2022

- Python backend support and process automation scripts for internal systems.

Stack: Python · Django · Autohotkey
